

Recommendations for Disassembly before Preparation and Paint

When refinishing vehicles, moldings, trim, and door handles, etc. must be removed whenever possible. Leaving parts on the car can lead to finish failure due to the substrate not being thoroughly sanded and cleaned appropriately in that area. There is also the risk that inadequate masking will lead to overspray on the trim or moldings which may be difficult or impossible to remove.

Axalta Coating Systems offers products with approved and specified repair processes that are together designed specifically for automotive refinishing. It is critical to the quality of the repair to use the recommended products following the approved processes outlined in Axalta's Technical Data Sheets.

Please visit the Axalta Coating Systems website for full details regarding warranted systems and their related procedures. In the event there are additional questions or additional information needs, please do not hesitate to contact your local Axalta Coatings Systems representative or call us at +1-855-6-AXALTA (1-855-629-2582).
