

Recommendations for Wet Bed Blending

A wet bed blending solution is recommended to assist with color blending in specified repair operations. The clear solution used in the process can help fill sand scratches and it gives a good foundation to perform color blending. Prior to color blend application, spray one even coat over the entire blend panel. This insures a proper color blend transition.

Axalta Coating Systems offers products with approved and specified repair processes that are together designed specifically for automotive refinishing. It is critical to the quality of the repair to use the recommended products following the approved processes outlined in Axalta's Technical Data Sheets.

Please visit the Axalta Coating Systems website for full details regarding warranted systems and their related procedures. In the event there are additional questions or additional information needs, please do not hesitate to contact your local Axalta Coatings Systems representative or call us at +1-855-6-AXALTA (1-855-629-2582).
